

# WESTPRO

## center pier clarifiers

### applications

Westpro's center pier clarifiers are designed for various water and wastewater applications.

- Wastewater industry
- Secondary clarification
- Fermenting
- Industrial minerals
- Petroleum industry

### advantages

- Low maintenance
- High efficiency spiral blades
- Electrical torque limiter
- Mechanical shear pin
- Heavy-duty construction
- Complete variable speed
- Reversible operation

### components

#### 1. Bridge Walkway & Platform

- Customizable deflection & width
- Optional walkway lighting
- Various grating material options
- Aluminum handrails
- Removable from system

#### 2. Rotating EDI

- Various construction material options
- Multiple tangential diffuser gates
- Closed bottom with holes designed as per required retention time.

#### 3. Flocculating Feedwell

- Baffled openings for scum exit
- Supported from drive cage

#### 4. Scum Collection Device (optional)

- Circumferential scum baffles
- Tangential skimmers (quantity as requested)
- Wiper assembly
- Scum trough

#### 5. Drive Cage

- Heavy-duty design for high torque applications
- Corrosion protection
- Supports EDI and flocculating feedwell

#### 6. Center Support Column

- Capable of high torque applications
- C/W diffusing ports
- Various construction material options

#### 7. Sludge Withdrawal Ring (optional)

- Designed to centralize sludge prior to exiting the system.

#### 8. Sludge Collector Rakes

- Efficient spiral sludge collection design
- Heavy-duty construction
